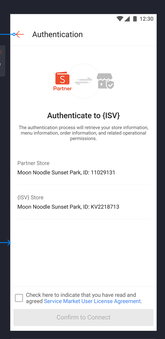
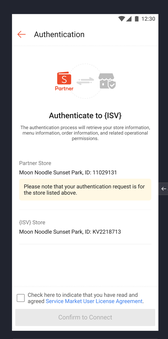
Authentication Agreement - Correct Account Logged In

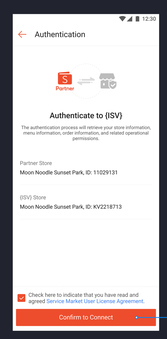


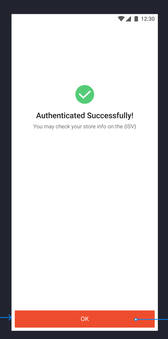
Case 1: the store for authentication is currently logged in and being viewed.



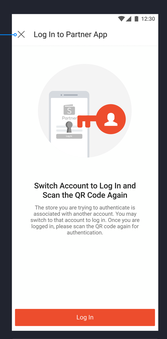
← add a tip

Case 2: The store for authentication is linked to the logged-in account but is not currently being viewed, and merchants need to understand that they are authenticating for a different store.

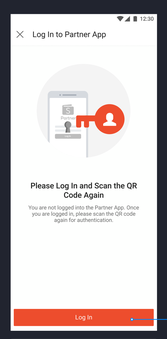




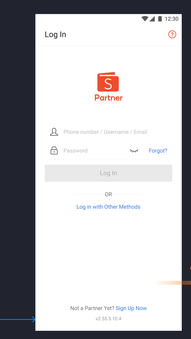
Authentication Agreement - NOT the Correct Account Logged In

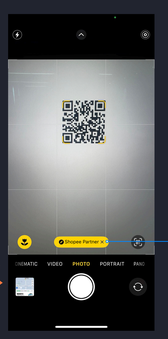


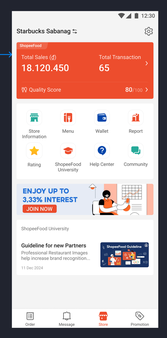
Case 1: Currently logged in, but ed to switch to another account.

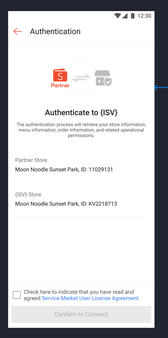


Case 2: Currently NO account logged in









After Log In
